

## **Polyurethane**

### Product Data Sheet

#### **Material Specifications**

---

**Available Sizes:** 24" x 24" (609.6mm x 609.6mm)  
**Standard Thickness:** .060" (1.524mm)

#### **Product Description and Key Features**

---

Polyurethane is primarily used for stamping large solid areas. This material is soft enough to aid in complete foil coverage but hard enough to prevent undesirable "punch" in the sheet. Polyurethane is also excellent for another application; kiss cutting, where the edge of the die delicately cuts the paper on an adhesive-backed substrate.

#### **Storage**

---

Dry, climate-controlled conditions

#### **Recommended For**

---

Hot foil stamping and kiss cutting jobs

**\*Disclaimer:** Before using this product, you must evaluate it and determine if it is suitable for your application. Storage conditions, metal type, temperature, size/weight, and cleanliness will affect bonding.
