

Redboard

Product Data Sheet

Material Specifications

Standard Size: 12" x 24" (304.8mm x 609.6mm)
Available Thickness: .030" (.762mm), .060" (1.524mm)

Product Description and Key Features

Redboard is primarily used as a baseboard for the makeready process of pouring counters. It's an ideal choice for this method of makeready and is very compatible with the pour-counter resin. Redboard also has excellent heat resistance properties. Ideal for most embossing and debossing applications, it's also used in makeready for foil stamping large image areas because it's considered a "soft" board.

Storage

Dry, climate-controlled conditions

Recommended For

Embossing and debossing jobs and large foil stamped areas

***Disclaimer:** Before using this product, you must evaluate it and determine if it is suitable for your application. Storage conditions, metal type, temperature, size/weight, and cleanliness will affect bonding.
